SUSHANT KUMAR YADAV

Data & Financial Analyst (Fresher) | Power BI · SQL · Python

New Delhi, India | +91 99905 87366 | skysushantm416@gmail.com | English, Hindi

linkedin.com/in/sushantkumaryadav310899 | github.com/Skysushant7366 | Portfolio: skysushant7366.github.io/Sushant-portfolio

PROFESSIONAL SUMMARY

Fresher Data & Financial Analyst with a B.Com (Honours) from the University of Delhi and four years of full-time banking and economics study. Builds SQL, Power BI and Python work with measurable results: audited **₹62.8L** of ad spend and showed that Facebook took **93.67%** of the budget while Google returned over 3x the ROAS (**5.86 vs 1.89**), and built an automated e-commerce pipeline that scores **161,000+** customers for fraud, churn and lifetime value. Available to join immediately.

CORE SKILLS

Querying and modelling	SQL on BigQuery, PostgreSQL and MySQL; dbt Cloud, ETL pipelines, data cleaning and validation
Dashboards and reporting	Power BI (DAX, Power Query), Tableau, Looker Studio; Excel (Pivot Tables, XLOOKUP, Power Query, Power Pivot, VBA)
Python, R and statistics	Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn; hypothesis and A/B testing, regression, clustering, forecasting
Automation and cloud	Google Cloud Platform, GitHub Actions (CI/CD), Power Automate
Business analysis	BRD, user stories, gap analysis, BPMN and UML diagrams, Agile and Scrum
Finance and banking	Macroeconomics, banking and financial systems, financial modelling, fraud and risk monitoring, KPI design

KEY PROJECTS

Ad Spend Audit and Budget Reallocation: Facebook vs Google — Oct 2026

Power BI (DAX, Power Query), Excel (Power Pivot) | GitHub · Dashboard walkthrough

Self-initiated case study on a real assessment brief (Growify Data Analyst).

- Audited ₹62.8L of ad spend (32 campaigns, 74 ad sets): Google returned a ROAS of 5.86 against Facebook's 1.89, yet Facebook received 93.67% of the budget.
- Built a 7-page Power BI report (star schema, 70 documented DAX measures) and a reallocation plan that lifts ad-attributed revenue by 3.78% (₹1.345 Cr to ₹1.396 Cr) at the same total budget.
- Showed that the +25% growth target cannot be met by reallocation alone, and flagged a checkout tracking gap with creative, offer and order-value fixes.

E-commerce Data and Marketing Analytics Pipeline — Jul – Aug 2026

BigQuery, dbt, SQL, Python, GitHub Actions, Power BI | GitHub · Architecture

- Built a nightly automated pipeline: 45+ dbt models in BigQuery shape a public e-commerce sample dataset, GitHub Actions runs the AI engine, and the Power BI dashboard refreshes daily with no manual step.
- Chained 8 machine learning models (fraud, returns, churn, lifetime value, price sensitivity, recommendations, channel, segmentation) to score 161,000+ customers, with Gemini drafting marketing copy per segment.

Bank Fraud Detection and Risk Monitoring — Jun – Jul 2026

BigQuery ML, SQL, Python, GitHub Actions, Looker Studio | GitHub · Dashboard

- Simulated 300,000+ transactions with 5 attack patterns and organised them in a 3-stage SQL pipeline on BigQuery, scheduled with keyless GitHub Actions (OIDC).
- Layered an XGBoost model with 15 statistical checks, the way banks use more than one control; caught 40 of 44 frauds (90.9% recall) on a simulated holdout set.
- Daily Looker Studio dashboard shows flagged transactions and the automated block or OTP decision.

Earlier Dashboards — 2025

Excel, Power BI, Python | Zomato Sales Analytics · Bank Marketing Analysis

- Zomato sales analytics: 2,748 transactions and 151K items sold. Bank marketing analytics: customer conversion by age and contact outcome.

PROFESSIONAL SIMULATIONS (FORAGE)

- **Quantium, Data Analytics:** Segmented 264,836 retail transactions in R and validated a pricing strategy with a statistical test; recommended a trial-store rollout. GitHub
- **BCG X, Data Science:** Churn model for a 14,600-customer utility base, 90.3% accuracy. GitHub
- **Deloitte Australia:** Tableau dashboard across 4 factories and 9 machine types. GitHub
- **PwC US, Management Consulting:** Three-scenario financial model projecting the profit impact of a merger. GitHub
- **EY, Forensic and Technology Risk:** Investigated a $24M account discrepancy and reviewed IT control gaps. GitHub
- **BCG X, GenAI:** Chatbot that answers comparison questions from company financial filings. GitHub

EDUCATION

B.Com (Honours), Atma Ram Sanatan Dharma College, University of Delhi (final result Apr 2021) — 2017 – 2020

RBI Grade B and banking exam preparation (full-time, self-directed) — Jul 2021 – Jul 2025

- Four years studying macroeconomics, monetary policy, banking regulation and financial systems.

CERTIFICATIONS

Microsoft Business Analyst Professional Certificate, Coursera (94.8%) — Mar 2026

Python for Data Science, AI & Development, IBM, Coursera (Apr 2026)

Advanced Data Visualisation with Tableau, Coursera (Apr 2026)

Advanced Excel & VBA Macros, Coursera (Jan 2026)

Financial Modelling & Valuation with AI, Internshala (Nov 2025)

Machine Learning with AI, Internshala (Oct 2025)

Tally Basics & Accounting, NSDC (Grade A) (Nov 2025)
